Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of the invention of Group I, claims 1-4, in Paper No. 4 is acknowledged.

Specification

The abstract of the disclosure is objected to because each sentence is presented as a new paragraph and the abstract should consist of only one paragraph. Correction is required. See MPEP § 608.01(b).

The disclosure is objected to because: at least on page 3, sixth line from the bottom and on page 5, line 4, the word "drug" should be changed, perhaps to --compound--.

Appropriate correction is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 1763

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent 5,085,757 issued to Karger et al. (hereinafter, Karger) in view of JP 01025866 (hereinafter, Tsuruta).

Karger teaches that it is necessary to remove the polymeric coating from the surface of electrophoresis capillary tubes.

Karger does not teach removing the polymer by heating it in the presence of ozone.

Tsuruta teaches removing organic material from a surface by heating the organic material in the presence of ozone.

It would have been obvious to one skilled in the art to remove the polymer coating from the surface of electrophoresis capillary tubes by heating the tubes in an ozone environment because Tsuruta teaches that this is an effective means to remove organic material from the surface of a workpiece. Tsuruta also teaches that the ozone treatment method provides uniform processing of a workpiece.

Allowable Subject Matter

Claim 2 is allowed.

Claims 3 and 4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record on the attached PTO form 892 is not relied upon but is considered pertinent to applicant's disclosure.
